TPMS & ACCESSORI PER GOMMISTI
TPMS & TYRE SHOP ACCESSORIES

N. 23

Fondata nel 1966, ITALMATIC ha iniziato ad operare nel settore della gomma ed in particolare nella progettazione, costruzione ed installazione di macchine ed impianti completi per la produzione e la ricostruzione degli pneumatici, ottenendo in breve tempo un forte riconoscimento internazionale. Dal 1983 Italmatic ha affiancato al business tradizionale un'ampia gamma di consumabili ed accessori per negozi gommisti e ricostruttori; oggi Italmatic è una società leader nel mondo per la completezza dell'offerta alle aziende che operano nel settore della ricostruzione, riparazione ed assistenza pneumatici.

Italmatic produce molti degli articoli trattati tra cui lame di rasatura e raspe, mole carbide, contrappesi di bilanciatura e materiale di riparazione (rappezi e chimici), con rilevanti quote di mercato a livello internazionale. Ai prodotti di propria fabbricazione viene affiancata la distribuzione, in molti casi in esclusiva, di articoli di primarie aziende internazionali tra le quali ad esempio Ruff, Patch Rubber, Schrader, Wonder, Safety Seal, Slime, Ingersoll Rand, OMCN, Alligator, PCL, Koken.

Dal 2013 Italmatic ha investito nella divisione TPMS per offrire una gamma completa di prodotti e servizi specifici, diventando uno dei principali attori sul panorama europeo per questo business. L'offerta TPMS comprende: un assortimento completo di sensori TPMS originali (Schrader, HUF, VDO, Pacific, TRW); la soluzione universale brevettata per il mercato del ricambio Italsensor® 3.0 EVO di italmatic, che offre la più ampia copertura ed affidabilità; le alternative rappresentate dai sensori universali programmabili di altri brand (tra i quali EZ-Sensor Schrader, REDI-Sensor VDO, Sens.it Alligator, Uni-Sensor CUB, IntelliSens Huf).

Established in 1966, ITALMATIC started operating in the rubber field and, in particular, in the designing, construction and installation of machines and complete plants to produce and retread tyres, obtaining in a short time a strong recognition at international level.

Since 1983 Italmatic put beside the traditional business a wide range of consumables and accessories for tyre shops and retreaders; today Italmatic is a leading company at worldwide level for the completeness of offer to the companies operating in the fields of retreading, repairing and assistance to tyres. Italmatic produces many of the items distributed, among which buffing blades and rasps, carbide tools, balancing weights, and repairing material (patches and chemicals) with relevant market shares at international level.

Beside the products of its own manufacture, Italmatic distributes, in many cases on an exclusivity basis, products from primary international companies such as Ruff, Patch Rubber, Schrader, Wonder, Safety Seal, Slime, Ingersoll Rand, OMCN, Alligator, PCL, Koken.

Since 2013 Italmatic has invested in TPMS division to offer a complete and wide range of products and specific services related to TPMS, becoming most recognized TPMS specialist and leading player in Europe. The TPMS offer includes: a complete assortment of OE TPMS (Schrader, HUF, VDO, Pacific, TRW); the patented solution for after-market branded Italsensor® 3.0 EVO by Italmatic, with wide vehicle park coverage degree; the alternative programmable sensors from other brands (among which EZ-Sensor Schrader, REDI-Sensor VDO, Sens.it Alligator, Uni-Sensor CUB, IntelliSens Huf).

Gamma completa di accessori e consumabili per la riparazione, cura ed assistenza pneumatici.
Complete range of accessories and consumables for repairing, care and assistance of tyres.
Gamme complète d'accessoires et consommables pour réparation, soin et assistance des pneus.

TIPOLOGIE DI NASTRI ADESIVI

TYPES OF ADHESIVE TAPES

TYPES DE RUBANS ADHÉSIFS

V2800

Approvato dal primo equipaggiamento da più di 25 anni
Tape approved by OEMs for more than 25 years

Materiale in schiuma di poliuretano con adesivo acrilico ad alta prestazione su entrambi i lati

- Approvato dal primo equipaggiamento da più di 25 anni
- Progettato per dare le migliori prestazioni in termini di resistenza alla trazione
- Adesivo acrilico ad alte prestazioni che fornisce un'adesione forte e di lunga durata
- Temperatura di servizio -40°C / +100°C
- Temperatura di applicazione: min. 15°C

Polyurethane foam core with high-performance acrylic adhesive on both sides

- Industry approved by OEMs for more than 25 years
- Designed to have the best performance in shear resistance and mismatch
- High performance, durable acrylic adhesive provides a strong, long-lasting bond.
- Service temperature -40°C / +100°C
- Application temperature: min. 15°C

V3030

Appositamente progettato per l'utilizzo in condizioni estreme
Specifically designed to meet the harsh requirements of aftermarket wheel weights

- Alta adesione e resistenza
- Si attacca rapidamente al cerchio con una preparazione minima della superficie
- Alta tenuta in condizioni non ideali (temperature estreme e superfici sporche)
- Aderisce ai cerchi freddi, nei cambi gomme nei mesi invernali
- Temperatura di servizio -40°C / +50°C
- Temperatura di applicazione: fino a circa -10°C

- High tack & dynamic shear.
- Sticks faster to rim surfaces with minimum preparation of surface.
- The adhesive and foam tape system improves bonding under wide range of weather & rim conditions.
- Sticks to cold rims critical for those tyre changes in winter months.
- Conformable foam core which allows the adhesive tape to fill in the gaps in uneven rim surfaces, giving better bond strength.
- Service temperature -40° C / +50°C
- Application temperature: down to approx -10°C

V3030 FINGER LIFT

Liner 3mm extra per una rimozione veloce ed una rapida bilanciatura
3mm Extra liner for fast peeling and quick balancing

- Rimozione facilitata grazie al liner che eccede la sagoma del peso
- Alta adesione e resistenza
- Si attacca rapidamente al cerchio con una preparazione minima della superficie
- Alta tenuta in condizioni non ideali (temperature estreme e superfici sporche)
- Aderisce ai cerchi freddi, nei cambi gomme nei mesi invernali
- Temperatura di servizio -40°C / +50°C
- Temperatura di applicazione: fino a circa -10°C

- *Fast peeling thanks to extraliner*
- *High tack & dynamic shear.*
- *Sticks faster to rim surfaces with minimum preparation of surface.*
- *The adhesive and foam tape system improves bonding under wide range of weather & rim conditions.*
- *Sticks to cold rims critical for those tyre changes in winter months.*
- *Conformable foam core which allows the adhesive tape to fill in the gaps in uneven rim surfaces, giving better bond strength.*
- *Service temperature -40°C / +50°C*
- *Application temperature: -10°C*

V3030R XTR

La nuova soluzione di riferimento per i gommisti: nessun residuo di adesivo
The new benchmark solution for Tyre Fitters: no foam residue

- Tecnologia "Clean peel"
- Nessun residuo di schiuma alla rimozione dei pesi
- Alta adesione e resistenza
- Si attacca più rapidamente alle superfici dei cerchi con una preparazione minima della superficie
- Aderisce ai cerchi freddi, nei cambi gomme nei mesi invernali
- Temperatura di servizio -40°C / +50°C
- Temperatura di applicazione: fino a circa -10°C

- "Clean peel" technology.
- No foam residue when removing weights.
- High tack & dynamic shear.
- Sticks faster to rim surfaces with minimum preparation of surface.
- Sticks to cold rims critical for those tyre changes in winter months.
- Service temperature -40°C / +50°C
- Application temperature: down to approx. 10°C

Secondo la direttiva 2000/53 UE i contrappesi in piombo (Pb) possono essere utilizzati sul territorio dell'Unione Europea solo per motocicli e camion del peso superiore a 3,5 ton.
 According to EC directive 2000/53 UE the wheel balancing weights made of lead (Pb) can be installed within the territory of European Union, only on motorcycles and trucks over 3,5 ton.

SISTEMA DI BILANCIATURA CON GRANULATO EPDM EQUILIBRYA
EQUILIBRYA EPDM GRANULATED BALANCING SYSTEM
SYSTÈME D'ÉQUILIBRAGE AVEC GRANULAT EPDM EQUILIBRYA

Innovativo granulato in EPDM, made in Italy, sviluppato per eliminare le vibrazioni del complesso pneumatico/cerchio. Adatto a pneumatici da Trasporto leggero, Trasporto pesante e autobus.

L'equilibratura con EQUILIBRYA è più accurata di quella tradizionale offre un risultato superiore (+60%) rispetto all'equilibratura tradizionale con i pesi, contrastando le forze e non le masse per eliminare le vibrazioni.

I pneumatici equilibrati con EQUILIBRYA presentano un'usura omogenea del battistrada e tutte le parti meccaniche del veicolo soggette a sollecitazioni - come i cuscinetti delle ruote, i tiranti dello sterzo ecc. - ricevono beneficio e durano di più.

EQUILIBRYA è ecologico, perché non contiene piombo ed è inerte ai fini dello smaltimento.

E' idoneo per essere utilizzato anche con i sensori di controllo pressione pneumatici (TPMS).

Innovative EPDM granulate, made in Italy, developed to eliminate vibrations of tyre/rim assembly. Suitable for light truck, truck and bus tyres.

Balancing with EQUILIBRYA is more accurate than the traditional one and offers a better result (+60%) than traditional balancing by weights, countering forces and not mass to eliminate vibrations.

Tyres balanced by EQUILIBRYA have a homogeneous wear of tread and all mechanical parts of the vehicle subject to stress – like bearings of wheels, tie rods of steering wheel etc. – get benefit and last more.

EQUILIBRYA is ecological, because it doesn't contain lead and it is inert for disposal.

It is suitable to be used also with tyre pressure monitoring systems (TPMS).

Granulat innovant en EPDM, made in Italy, développé afin d'éliminer les vibrations du groupe pneu/jante. Indiqué pour pneus camionnette, camion et bus.

L'équilibrage par EQUILIBRYA est plus précis du traditionnel et offre un résultat supérieur (+60%) comparé à l'équilibrage traditionnel par les masses, en combattant les forces et non pas les masses pour éliminer les vibrations.

Les pneus équilibrés par EQUILIBRYA ont une usure homogène de la chape et toutes parties mécaniques du véhicule objet de sollicitations – telles que roulements des roues, tirants de la direction etc. – en tirent profit et durent plus longtemps.

EQUILIBRYA est écologique, parce qu'il ne contient pas de plomb et il est inerte pour l'élimination.

Il est indiqué pour être utilisé même avec les senseurs de contrôle pression pneus (TPMS).

* Per queste misure, con pneumatico gemellato aggiungere 50 gr.
 Per le gomme di automobili, utilizzare il nucleo valvola speciale in dotazione.
 Nota: tolleranza +/- 10gr rispetto a quanto indicato in tabella

* For these sizes, in twin configuration, add 50 G per tire.
 For passenger tires, install the special valve supplied.
 Note: tolerance +/- 10gr compared to what shown in table

COME INSTALLARE LE SFERE DI BILANCIATURA

1. Scegliere il codice corretto secondo la tabella applicative.
2. Pulire il cerchio, ed utilizzare il lubrificante per pneumatici.
3. Aprire la confezione e inserire il pacchetto all'interno del pneumatico.
4. Gonfiare la gomma con aria secca ed installare lo spillo nichelato nella valvola

HOW TO INSTALL BEAD BALANCE

1. Check Application Chart for the proper amount of beads.
2. Clean the rim and carefully apply mounting lubricants.
3. Mount bottom tire bead and place inner pouch in the tire.
4. Complete tire mounting and install the provided metal sealing cap.

COMMENT INSTALLER LES BILLES D'ÉQUILIBRAGE

1. Choisir le sachet exact de BB selon le Tableau d'Application.
2. Nettoyer la jante et utiliser un peu de lubrifiant au pneu.
3. Ouvrir le sachet extérieur et mettre le sachet INTERIEUR dans le pneu.
4. Gonfler le pneu avec de l'air sec, et installer la soupape nickelée fournie.

VALVOLE PER VEICOLI COMMERCIALI
VALVES FOR COMMERCIAL VEHICLES
VALVES POUR VÉHICULES COMMERCIAUX

TR 600XHP

Applicazione: per furgoni, roulotte / cam-pers, fuoristrada, camionette.

Caratteristiche rispetto alle valvole Snap-in comuni:

- Gamma di pressione estesa (fino a 6,9 bar) che aumenta la sicurezza;
- Gambo in metallo più lungo che si estende nel foro del cerchio, garantendo una maggior stabilità durante la guida e prevenendo un'eccessiva espansione durante la procedura di montaggio;
- Possibilità di utilizzo con prolunga;
- Facile installazione con l'ausilio di acqua. Non usare pasta per montaggio pneumatici;
- Facile procedura di smontaggio, semplicemente spingendo la valvola attraverso il foro del cerchio.

Application: for vans, motor homes, off-road

vehicles, light truck.

Key features compared to common Snap-in valves:

- Extended pressure range (up to 6,9 bar) increases security;
- Longer metal stem, extended into the rim hole, provides more stability during driving and prevents excess of expansion during the mounting process;
- Possible usage with valve extension
- Simple installation with the aid of water. Do not use tyre mounting paste;
- Simple dismounting process, just pushing the valve through the rim hole.

Application: pour fourgons, roulotte / cam-

pers, tout-terrain, camionnettes.

Caractéristiques comparé aux valves Snap-in communes:

- Gamme de pression étendue (jusqu'à 6,9 bar) qui augmente la sécurité;
- Tige en métal plus longue, étendue dans le trou de la jante, qui garantie plus de stabilité pendant la conduite et prévient une expansion excessive pendant le montage;
- Utilisation possible avec rallonge valve;
- Installation simple à l'aide d'eau. Ne pas utiliser pâte de montage pneus;
- Démontage simple, pousser la valve à travers le trou de la jante.

CVV

Applicazione: per furgoni, roulotte / cam-pers, fuoristrada, camionette.

Caratteristiche chiave rispetto alle valvole Snap-in comuni:

- Pressione fino a 7 bar;
- Cappelletto valvola con tenuta di qualità superiore;
- Il cappelletto valvola non necessita di essere rimosso durante il montaggio;
- Bordo di tenuta ottimale;
- Labbro di tenuta altamente flessibile: utilizzare pasta montaggio pneumatici durante il montaggio della valvola;
- Rondella a spinta brevettata con punto di rottura predeterminato per una facile rimozione (nessun danno ai cerchi): rompere semplicemente l'anello in plastica con le pinze o con un cacciavite per toglierla.

Application: for vans, motor homes, off-road

vehicles, light truck.

Key features compared to common Snap-in valves:

- Pressure up to 7 bar;
- Top Quality sealed valve cap;
- Valve cap doesn't need to be removed during assembly;
- Optimal sealing contour;
- Highly flexible sealing lip: use tyre mounting paste while mounting the valve;
- Patented thrust washer with predetermined breaking point for easy removal (no damage to rims): just break the plastic ring with pliers or a screwdriver to remove.

Application: pour fourgons, roulotte/campers, tout-terrain, camionnettes.

Caractéristiques dominantes comparé aux valves Snap-in communes:

- Pression jusqu'à 7 bar;
- Bouchon valve à étanche de qualité supérieure;
- Le bouchon valve ne nécessite pas d'être enlevé pendant le montage;
- Contour d'étanche optimal;
- Lèvre d'étanche très flexible: utiliser pâte montage pneus pendant le montage de la valve;
- Rondelle de butée brevetée avec point de rupture prédéterminé pour enlèvement facile (pas de dommages aux jantes): rompre tout simplement l'anneau en plastique par des pinces ou par un tournevis pour l'enlèvement.

ASC-HT

Applicazione: per furgoni, roulotte / cam-pers, fuoristrada, camionette.

Caratteristiche chiave rispetto alle valvole Snap-in comuni:

- Pressione fino a 14 bar;
- Tenuta ad alte temperature (max. fino a 150°C);
- Concetto di tenuta completamente nuovo che assicura una pressione costante per la durata della valvola;
- Il cappelletto valvola non necessita di essere rimosso durante il montaggio;
- Il disco di plastica protegge i cerchi in lega;
- La base valvola arrotondata previene danni al pneumatico.

Application: for vans, motor homes, off-road

vehicles, light truck.

Key features compared to common snap-in valves:

- Pressure up to 14 bar;
- High temperature-sealing (max up to 150°C);
- Completely new sealing concept which ensures constant pressure tightness during the valve lifecycle;
- Valve cap doesn't need to be removed during assembly;
- Captive plastic disc protects alloy rims;
- Rounded valve base to prevent tyre damages.

Application: pour fourgons, roulotte/campers,

tout-terrain, camionnettes.

Caractéristiques dominantes comparé aux valves Snap-in communes:

- Pression jusqu'à 14 bar;
- Étanche hautes températures (max. jusqu'à 150°C);
- Concept d'étanche complètement neuf qui assure une pression constante pendant la durée de la valve;
- Le bouchon valve ne nécessite pas d'être enlevé pendant le montage;
- Le disque en plastique protège les jantes en alliage;
- Base valve arrondie pour prévenir dommages au pneu.

Prolunghe in plastica con attacco corto

Plastic extensions with short connection - Rallonges en plastique avec connexion courte

Codice Code Code	Descrizione Description Description	Lungh. mm Length in mm Longueur en mm	Applicazione Application Application
3040154A	Prolunga in plastica - Attacco 15mm Plastic extension - 15mm Rallonge en plastique - 15mm	61	 
3040154C	Prolunga in plastica - Attacco 15mm Plastic extension - 15mm Rallonge en plastique - 15mm	85	 
3040154E	Prolunga in plastica - Attacco 15mm Plastic extension - 15mm Rallonge en plastique - 15mm	105	 
3040154G	Prolunga in plastica - Attacco 15mm Plastic extension - 15mm Rallonge en plastique - 15mm	115	 
3040154J	Prolunga in plastica - Attacco 15mm Plastic extension - 15mm Rallonge en plastique - 15mm	140	 
3040154M	Prolunga in plastica - Attacco 15mm Plastic extension - 15mm Rallonge en plastique - 15mm	160	 
3040154P	Prolunga in plastica - Attacco 15mm Plastic extension - 15mm Rallonge en plastique - 15mm	170	 

- Ideale per utilizzo con valvola snap-in in gomma (furgoni)
- Best fit with rubber snap-in valve (van/light truck)
- Idéale pour utilisation avec valve à détente en caoutchouc (camionnette)

EUROPEAN PROFILE SAFETY QUICK CONNECTORS

RACCORDS RAPIDES DE SÉCURITÉ PROFIL EUROPÉEN

Raccordi brevettati con trattamento anticorrosione dalle elevate prestazioni Patented connectors with high performance anti-corrosion treatment

- Sistema di aggancio a spine (sforzo minimo, tenuta ottimale)
- Antistatici, evitano l'attrazione della polvere durante l'applicazione di lacche o vernici
- Antigraffio, corpo in materiale composito a base di fibre di vetro, assorbe gli impatti evitando graffi sulle superfici
- Robusti e leggeri, anti abrasione, anti urto, anti schiacciamento, anti vibrazioni
- Connessione a sgancio di sicurezza con meccanismo di decompressione, garantisce sgancio senza rischio di colpo di frusta
- Pins hooking system (minimum effort, optimal grip)
- Antistatic, they prevent dust attraction during the application of lacs or paints
- Anti-scratch, body in glass fiber based composite material, it absorbs impacts avoiding scratches on surfaces
- Stout and light, abrasion-resistant, shockproof, anti-squashing, anti-vibration
- Connection with safety release with decompression mechanism, it assures release without risk of whiplash

3080085M	VOYAGER	<p>Macchina per il montaggio degli anelli conici su cerchioni sia a 3 pezzi che a 5 pezzi da 25" a 35". Facilita il montaggio della guarnizione O-Ring e dell'anello di arresto-seeger. Tutte le operazioni sono eseguibili da un solo operatore. Possibilità di ruotare di 360°, ciò permette di lavorare su qualsiasi punto del cerchio. <i>VOYAGER is a conic rings alignment machine for E.M. on 3 and 5 pieces from 25" to 35". Easy assembly of O-Ring and ring stop-seeger. All operations can be performed by an operator only. Possibility to rotate of 360°, this allows to work on any point of the rim. VOYAGER est un outil à l'alignement des anneaux coniques pour les engins de terrassement de 3 à 5 pièces de 25" à 35". Montage facile du joint et de la bague de butée. Toute opération peut être faite par un seul opérateur. Rotation de 360° qui permet de travailler sur n'importe quel point de la jante.</i></p>	39
3080086	VIKING 4 MAGNETIC	<p>Lavora nella parte interna del cerchio. Si appoggia al telaio della macchina e spinge l'anello del cerchio il quale a sua volta stallona il pneumatico dalla sua sede. Utilizzato su cerchioni sia a 3 pezzi che a 5 pezzi, di macchine movimento terra che vanno da 25" a 51". In dotazione ha 5 prolunghe (una da 100 mm, due da 50 mm e 2 da 25 mm). <i>Acts on the inner part of the rim. It leans on the chassis of the machine and pushes the ring of the rim which removes the tyre from its seat. Used with rims in three and five pieces, mounted on earth-moving machines from 25" to 51". It is delivered with 5 extensions (one of 100 mm, two of 50 mm each and 2 of 25 mm each) as standard accessories. Utilisé sur l'intérieure de la jante. il appuie sur la châssis de la machine et pousse la bague de la jante qui enlève le pneu de son siège. Utilisé sur les jantes de 3 à 5, pièces montées sur les engins de terrassement de 25" à 51". Il est fourni avec 5 allonges (une de 100mm, deux de 50 mm et deux de 25 mm) en tant d'accessoires standards.</i></p>	3
3080086C	SHUTTLE-8 SP	<p>Adatto a stallonare il tallone dei pneumatici con qualunque tipo di cerchioni da 5 pezzi dotati del corretto punto di attacco su ambo i lati, da 25" a 51". Questo tipo di cerchioni è comunemente utilizzato su caterpillar di medie e grandi dimensioni <i>Can be used to detach bead of the tyres of all types of rims in five pieces which have the proper anchoring seat on both sides, from 25" to 51". This type of rims are commonly used on big and medium-sized caterpillars. Est utilisé pour décoller le talon des pneus de tout genre aux jantes à 5 pièces qui ont le bon ancrage des deux côtés de 25" à 51". Ce type de jantes sont communément utilisés sur les grandes et moyennes chenilles.</i></p>	6,8

Una soluzione rivoluzionaria per inserire i bulloni più difficili. Il potente design ad anello in attesa di brevetto fornisce fino al 50% in più di coppia. Elimina la necessità di utensili aggiuntivi, generando risparmio di tempo, potenza e versatilità per aumentare la produttività.

A revolutionary solution to bust through the most stubborn bolts. The patent-pending power ring design provides up to 50% more torque. Eliminate the need for additional tools, providing timesaving power and versatility to increase productivity

POTENZA

Il potente design ad anello in attesa di brevetto aumenta la coppia fino al 50% sulle bussole da 1/2"

PRODUCTIVITY

With the PowerSockets™, less work and effort are required to do the same job.

VERSATILITA'

La PowerSocket™ va bene per qualsiasi bussola da 1/2" riducendo la necessità di utensili aggiuntivi.

ACCESS

The PowerSockets™ provide a compact solution to give power in the tightest spaces.

Durata

A	Grande resistenza	Impact-grade toughness
B	Acciaio cromo-molibdeno	Chrome-molybdenum steel
C	Dimensioni incise a laser	Laser-etched size labelling

MATERIALE RIPARAZIONE ITALREPAIR

ITALREPAIR REPAIR MATERIAL

MATÉRIEL POUR RÉPARATIONS ITALREPAIR

italrepair

ITALMATIC è un fornitore di riferimento per materiale ed accessori per la riparazione pneumatici. La nuova gamma Italrepair® è una gamma completa per la riparazione professionale di pneumatici e camere. L'utilizzo di materie prime di alta qualità e di avanzate tecnologie per la produzione garantiscono alti standard di qualità (sicurezza, durata, semplicità di installazione, ecc.)

Pezze per camera

Le pezze ITALMATIC sono composte da un corpo nero vulcanizzato con sottostrato di gomma autovulcanizzante. Le pezze possono essere vulcanizzate a temperatura ambiente, con l'utilizzo del cemento Italmatic. I bordi sono concepiti per dare una migliore adesione e tenuta intorno al danno trattato. I bordi possono essere sovrapposti per permettere di riparare danni che si trovano vicini.

Rappezzi radiali

Rappezzi a vulcanizzazione chimica, rinforzati con tessuto, prodotti per resistere al calore e a flessione estrema durante l'utilizzo. Possono essere vulcanizzati a freddo (chimicamente) o in presse /autoclavi. Oppure con vulcanizzatore laddove il danno al pneumatico viene vulcanizzato separatamente (riparazione del singolo punto) ed i rappezzi vengono applicati sul danno all'interno dello pneumatico.

Chimici

Il Cemento ITALMATIC (Fast Dry e HD-Blue) è formulato per offrire la migliore prestazione quando utilizzato in combinazione con pezze e rappezzi ITALMATIC. Estremamente facile da applicare, con un tempo di asciugatura. Ha una lunga durata e fornisce un'adesione eccellente per tutte le applicazioni.

ITALMATIC is well reputed global supplier of all types of tyre & tube repair materials. The new range Italrepair® includes everything required for a professional tyre and tube repair. The use of high quality raw materials and state-of-art manufacturing technologies for making our products guarantee high quality standards (safety, durability, simplicity of installation, etc.)

Tube Patches

ITALMATIC tube repair patches are made of cured black body with self-vulcanizing cushion gum. Patches can be vulcanized with atmospheric temperature using Italmatic cement. The feather edges provide better bonding and sealing around the prepared injury. The feather edges can also be layered to allow repair injuries that are close together.

Radial tyre repair Patches

Chemically vulcanizing, fabric reinforced single repair unit patches, manufactured to withstand extreme heat and flexing in the field. Can be cured chemically at room temperature or when tyres are cured in retread moulds, pre-cure tyre steam bonders/electric chamber with high or low temperature. Also, where tyre injury alone (Spot repairing) is cured separately and patches applied over the injury inside the tyre afterwards.

Chemicals

ITALMATIC Cement (Fast Dry and HD-Blue) is formulated to provide outstanding performance when used with ITALMATIC Repair materials. Extremely easy to apply having outstanding drying time suitable to atmospheric temperature of different location. Cement has a long shelf life and provides excellent adhesion for all application.

La gamma Italrepair include:

- Pezze camera.
- Rappezzi radiali.
- Stringhe e inserti (Monofill) per riparazioni d'emergenza
- Funghetti (Combi) per riparazioni permanenti
- Rappezzi Univerali
- Chimici: soluzione autovulcanizzante, sigillante talloni, sigillante per riparazioni, liquido buffer per pulizia, soluzione per riparazione a caldo.

Italrepair range includes:

- Tube repair patches.
- Radial repair patches.
- Strings & inserts (Monofill) for emergency puncture repair.
- Plugs (Combi) for permanent puncture repair.
- Universal Patches.
- Chemicals: cement, bead sealer, sealer for repairing, buffer for cleaning, hot repair cement

Rappezzi universali per forature

Universal patches for puncture injuries - Emplâtres universels pour crevaisons

Le riparazioni Uni-Patch possono essere utilizzate universalmente per danni da foratura su qualsiasi tipo di pneumatico: vettura, trasporto leggero, camion, a tele diagonali o radiale, con camera o tubeless.

The Uni-Patch Repairs can be universally used for puncture injuries in every type of tyre: passenger, light truck, truck, bias or radial, tubeless or tube-tyre.

Les réparations Uni-Patch peuvent être utilisées universellement pour dommages causés par crevaisons sur n'importe quel type de pneu: tourisme, camionnette, camion, à toiles diagonales ou radial, avec chambre à air ou tubeless.

A) Per forature su tutti i tipi di pneumatici

For puncture injuries on all type of tyres - Pour crevaisons sur tout type de pneus

Funghetti per riparazioni pneumatici radiali - tipo Dual Cure

Plugs for radial tyres - Dual Cure model

Emplâtres en forme de champignon pour pneus radiaux - modèle Dual Cure

I funghetti per riparazione vanno utilizzati per forature solo se l'angolo della penetrazione è inferiore a 20° rispetto alla perpendicolare. Per angoli maggiori, utilizzare un plug stem ed il rappezzo appropriato.

Pilot Wire patch plugs are to be used for punctures only if the angle of penetration is not more than 20° from the perpendicular. If the angle is greater than 20° use a separate plug stem and the appropriate repair unit.

Les chevilles champignon pour réparation doivent être utilisées pour crevaisons seulement si l'angle de la pénétration est inférieur à 20° comparé à la perpendiculaire. Pour angles majeurs, utiliser un plug stem et l'emplâtre approprié.

Procedura di applicazione funghetti

Plugs application procedure - Procédure d'application emplâtres en forme de champignon

Rimuovere corpi estranei e sondare il danno con un punteruolo smussato per determinare l'angolo di penetrazione*

*Nota: Se l'angolo è maggiore di 20° perpendicolarmente, non usare la combinazione rappazzo-funghetto. Utilizzare un funghetto separato e l'unità di riparazione appropriata.

*Remove foreign object and probe the injury with a blunt awl to determine the angle of penetration**

*Note: If the angle is more than 20° from perpendicular, do not use the combination patch-plug. Use a separate plug stem and the appropriate repair unit.

*Enlever les corps étrangers et sonder le dommage par un poinçon arrondi afin de déterminer l'angle de pénétration**

*Note: Si l'angle est majeur de 20° perpendiculairement, ne pas utiliser la combinaison emplâtre-emplâtre en forme de champignon. Utiliser un emplâtre en forme de champignon séparé et l'unité de réparation appropriée.

Pulire la zona attorno al danno con il Fluido Pulente Patch Rubber ed un raschietto.

Clean the area around the injury with Patch Rubber Cleaner Fluid and a scraper.

Nettoyer la zone autour du dommage par le fluide nettoyant Patch Rubber et un racloir.

Usare un trapano a bassa velocità (500-700 giri/min) e la fresa carbide di dimensioni appropriate*, alesare il danno seguendo l'angolo di penetrazione quattro volte dall'interno del pneumatico e quattro volte dall'esterno del pneumatico.

Using a low speed drill (500-700 RPM) and the appropriate size carbide cutter, ream the injury following the angle of penetration four times from the inside of the tire, and four times from the outside.*

Utiliser une foreuse à basse vitesse (500-700 tours/min) et la fraise carbide de dimensions appropriées, aléser le dommage en suivant l'angle de pénétration quatre fois par l'intérieur du pneu et quatre fois par l'extérieur du pneu.*

Utilizzare una raspetta a bassa velocità (max. 5000 giri/min) ed una mola di rasatura per raspare il bordo interno di 1/2" più largo del rappazzo (RMA = 1 grado di rasatura)

Use a low speed buffer (max. 5000 RPM) and a buffing stone to buff the innerliner 1/2" larger than the patch (RMA #1 Buffing Texture.)

Utiliser une râpe à basse vitesse (max. 5000 tours/min) et une meule de râpage pour râper le bord intérieur de 1/2 " plus large de l'emplâtre (RMA = 1 degré de râpage)

Togliere la polvere di rasatura aspirando, poi pulire la zona rasata con il fluido pulente ed un raschietto per evitare di contaminare il canale del danno.

Remove buffing dust with a vacuum, then clean the buffed area with cleaner fluid and a scraper to avoid contaminating the injury channel.

Enlever la poudrette de râpage en aspirant, après nettoyer la zone râpée par le fluide nettoyant et un racloir afin d'éviter de contaminer le canal du dommage.

Applicare uno strato uniforme di soluzione autovulcanizzante Fast-Dry Patch Rubber sulla zona rasata. Lasciar asciugare completamente. Il tempo di asciugatura varierà a seconda della temperatura e dell'umidità.

Apply an even coat of Patch Rubber Fast-Dry Self-Vulcanizing Cement to the buffed area. Allow to dry completely. Drying time will vary depending on temperature and humidity.

Appliquer une couche uniforme de solution autovulcanisante Fast-Dry Patch Rubber sur la zone râpée. Laisser sécher complètement. Le temps de séchage changera selon la température et l'humidité.

Immergere il punteruolo nella soluzione ed inserirlo nel danno per lubrificare il danno.

Dip awl into cement and insert into injury to lubricate the injury.

Plonger le poinçon dans la solution et l'insérer dans le dommage pour lubrifier le dommage.

Mentre la soluzione è ancora bagnata, inserire il cavo guida attraverso il danno dall'interno. Usare le pinze, afferrare il gambo dietro al cavo e tirare fino a quando il rappazzo è posizionato contro il bordo interno. Non tirare troppo causando la depressione del rappazzo.

While the cement is still wet, insert the guide wire through the injury from the inside. Using pliers, grasp stem behind the wire and pull until the patch is seated against the innerliner. Do not over-pull and cause the patch to dimple.

Quand la solution est encore mouillée, insérer le câble guide à travers le dommage par l'intérieur. Utiliser les pinces, prendre la tige derrière le câble et tirer jusqu'à quand l'emplâtre est positionné contre le bord intérieur. Ne tirer pas trop en causant la dépression de l'emplâtre.

Far aderire il rappazzo vigorosamente dal centro lavorando verso l'esterno. Impiegare la maggior pressione manuale possibile.

Stitch the repair unit vigorously from the center working outwardly. Use as much hand pressure as possible.

Faire adhérer l'emplâtre avec force du centre en travaillant vers l'extérieur. Utiliser la majeure pression manuelle possible.

Applicare sigillante per riparazioni Patch Rubber nella zona rasata in eccesso.

Apply Patch Rubber Repair Sealer to the over buff area.

Appliquer la solution adhésive pour réparations Patch Rubber dans la zone râpée en excès.

Applicare sigillante talloni Patch Rubber sul tallone del pneumatico prima del gonfiaggio per prevenire perdite d'aria attorno al tallone.

Apply Patch Rubber Bead Sealer to the bead of the tire before inflation to help prevent air loss around the bead.

Appliquer la solution adhésive talons Patch Rubber sur le talon du pneu avant du gonflage pour prévenir des pertes d'air autour du talon.

Dopo il gonfiaggio, tagliare il funghetto a livello con la zona battistrada esterna. Rimettere il pneumatico in uso.

After inflating, cut the plug flush with the outside tread area. Return tire to service.

Après le gonflage, couper l'emplâtre en forme de champignon à niveau de la zone de la chape extérieure. Remettre le pneu en service.

Air hammer / Marteau pneumatique

Codice Code Code	Descrizione Description Description	Applicazione Application Application	Lungh. mm Length in mm Longueur en mm
3080087H	Battitore pneumatico per sbloccare barre e tiranteria meccanica <i>Air hammer for coupling bar</i> <i>Marteau pneumatique pour barre d'accouplement</i>	automobili e furgoni <i>cars and commercial vehicles</i> <i>automobiles et véhicules commerciaux</i>	cm 35 x 18
3080087J	Battitore pneumatico per sbloccare barre e tiranteria meccanica <i>Air hammer for coupling bar</i> <i>Marteau pneumatique pour barre d'accouplement</i>	camion <i>truck</i> <i>camion</i>	cm 40 x 20
3080087K	Chiave sblocco barre di accoppiamento <i>Tool to loosen the coupling bar and steering bar</i> <i>Outil pour débloquer la barre d'attelage et la barre de direction</i>	—	—

Il battitore pneumatico è un valido aiuto per sbloccare braccetti e tiranti arrugginiti o bloccati dall'ossido. Normalmente si utilizzano martelli, fiamme e spray che non sempre si dimostrano efficaci.

A volte è necessario l'impiego di due persone per riuscire a sbloccare braccetti molto arrugginiti.

Grazie al battitore pneumatico l'operatore può lavorare da solo ed in spazi ridotti, senza danneggiare componenti meccanici.

Basta infatti inserire l'utensile nel braccetto, azionarlo ruotandolo in modo che possa agire su tutta la superficie, ed in pochi secondi il braccetto sarà pronto per la regolazione.

È importante regolare il flusso di ingresso dell'aria per un'efficiente percussione in funzione del braccetto da sbloccare.

The pneumatic beater is a valid help to unlock rusty arms and tie-rods or stuck by oxide.

Normally hammers, flames and sprays are used, which are not always efficient.

Sometimes two persons are necessary to be able to unlock very rusty arms.

Thanks to the pneumatic beater, the operator can work alone and in reduced spaces, without damaging mechanical components.

In fact, it is enough inserting the tool in the arm, operating it rotating so that it can act on the whole surface and, in a few seconds, the arm will be ready for adjustment.

It is important regulating the air inlet flow for an efficient percussion according to the arm to be unlocked.

Le batteur pneumatique est une aide valide pour débloquer bras et tirants rouillés ou bloqués par l'oxyde.

Normalement on utilise marteaux, flammes et vaporisateurs, qui ne sont pas toujours efficaces.

Quelques fois deux personnes sont nécessaires pour réussir à débloquer bras très rouillés.

Grâce au batteur pneumatique l'opérateur peut travailler tout seul et dans des espaces étroits, sans endommager les composantes mécaniques.

En effet, il suffit d'insérer l'outil dans le bras, de l'actionner de façon qu'il peut agir sur toute la surface et, en quelques secondes, le bras sera prêt pour le réglage.

Il est important de régler le flux d'entrée air pour une percussion efficace en fonction du bras à débloquer.

**Caratteristiche del rigatore Rillfit SIX®
Features of Rillfit SIX® groover
Caractéristiques du sculpteur Rillfit SIX®**

Il Rillfit SIX® è il prodotto ideale per i professionisti:

- 1 Trasformatore toroidale Hi-Tech con interruttore termico per taglio non-stop sicuro e potente
- 2 Interruttore 4 livelli di potenza facile da visualizzare
- 3 Cavo speciale e rivestimento cavo per prevenire surriscaldamento
- 4 Cavo di connessione super flessibile
- 5 Nuovo led On/Off
- 6 Impugnatura ergonomica
- 7 Maggior protezione dal calore sulla testa dell'impugnatura
- 8 Maggior resistenza all'acqua del trasformatore
- 9 Certificato TUV & CE

Rillfit SIX® is the ideal product for professional operators:

- 1 Hi-Tech toroidal power transformer with thermo-switch for safe and powerful non-stop cutting
- 2 Easy to visualize 4 power steps switch
- 3 Special cable and cable cover to prevent overheating
- 4 Super flexible connection-cable
- 5 New On/Off led
- 6 Ergonomic handgrip
- 7 Increased heat protection on the handle head
- 8 More water resistant transformer casting
- 9 TUV & CE certificated

Rillfit SIX® est le produit idéal pour les professionnels:

- 1 Transformateur toroidal Hi-Tech avec interrupteur thermique pour coupe non-stop puissante et en sécurité
- 2 Interrupteur phases à 4 puissances facile à visualiser
- 3 Câble spécial et revêtement câble pour prévenir le surchauffage
- 4 Câble de connexion super flexible
- 5 Nouveau led On/Off
- 6 Poignée ergonomique
- 7 Protection de la chaleur augmentée sur la tête de la poignée
- 8 Résistance à l'eau du transformateur plus haute
- 9 Certifié TUV & CE

Consigli per l'utilizzo - Suggestions for use - Recommandations d'emploi:

- Rillfit SIX® è usato principalmente per intagliare i disegni del battistrada dei pneumatici;
- Non appena Rillfit SIX viene premuto contro il pneumatico da riscoprire, la lama si riscalda automaticamente. Per intagliare a zig-zag, si dovrà allentare la pressione mentre si gira la lama
- L'intaglio dovrà essere eseguito rapidamente. Gomma che brucia senza fiamma o presenza di fumo indicano che il taglio viene eseguito troppo lentamente o che la potenza è regolata troppo alta.

- Rillfit SIX® is mainly used for cutting tyres tread patterns;
- As Rillfit is pressed against the Tyre to be re-grooved, the blade is automatically heated. In order to cut zig-zag patterns, the pressure should be released while turning the blade;
- Cutting should be executed quickly. Smoke or smouldering rubber are indications that the cutting is being executed too slowly or that the power setting is too high.

- Rillfit SIX® est employé principalement pour sculpter les profils de la chape des pneus
- Dès que le Rillfit SIX fait pression contre le pneu à être sculpté, la lame chauffe automatiquement. Pour sculpter des profils zig-zag, on devra diminuer la pression tandis que la lame est tournée
- La coupe devra être faite rapidement; du caoutchouc qui brûle sans flamme ou la présence de fumée indiquent que la coupe est faite trop lentement ou que la puissance est réglée trop haute

In grado di avviare il veicolo semplicemente sfruttando la carica residua della batteria anche se completamente esaurita
 Non necessita manutenzione, non necessita ricarica periodica a differenza dei tradizionali avviatori
 Facile da utilizzare
 Leggero
 Resistente alle temperature estreme
 Progettato in Australia per il soccorso nel deserto
 Brevettato

Capable to start the vehicle simply exploiting the residual charge of the battery even if completely exhausted. It doesn't need maintenance, it doesn't need periodical recharge differently from traditional starters.
 Easy to use
 Light
 Resistant to extreme temperatures
 Designed in Australia for rescue in the desert
 Patented

Capable de faire démarrer le véhicule simplement en exploitant la charge résiduelle de la batterie même si complètement épuisée. Il ne nécessite pas d'entretien, il ne nécessite pas de recharge périodique différemment des démarreurs traditionnels.
 Convivial
 Léger
 Résistant aux températures extrêmes
 Conçu en Australie pour le secours dans le désert
 Breveté

SPECIALISTI DEL TPMS

TPMS SPECIALIST

TPMS SPECIALISTES

L'obiettivo del programma Italmatic è quello di offrire la giusta risposta a qualsiasi esigenza in ambito TPMS, indipendentemente dal marchio del sensore e degli strumenti, e la necessaria consulenza e supporto.

L'offerta comprende:

- Un assortimento completo di sensori TPMS originali O.E. (Schrader, Huf, VDO, TRW, Pacific, ecc.)
- La soluzione universale ITALMATIC itsensor®
- Le altre soluzioni universali per il mercato del ricambio (Schrader EZ Sensor, Huf IntelliSens, Alligator Sens.it, ecc.).
- La gamma multi-brand di strumenti di diagnosi, clonazione e riprogrammazione sensori (Italmatic, Ateq, Bartec, Tecnomotor, ecc), anche con la connessione OBD2 necessaria per il riapprendimento dei sensori dopo l'installazione.
- La gamma completa di Service Kits per la manutenzione ordinaria dei sensori che deve essere effettuata ad ogni cambio di pneumatico, unitamente alla comoda valigetta assortita con i service kits necessari per la maggior parte dei veicoli in circolazione;
- Gli utensili meccanici e dinamometrici per il montaggio e smontaggio dei sensori.

Italmatic propone inoltre una serie di servizi quali programmi di Training, teorico e pratico, servizi web/database integrabili con applicazioni dei clienti (es. configuratore on-line), assistenza tecnica

The aim of the Italmatic program is to offer the correct answer to any requirement for TPMS, independently on the brand of sensor and of instruments and the necessary consultancy and support.

The offer includes:

- A complete assortment of TPMS original O.E. sensors (Schrader, Huf, VDO, TRW, Pacific, etc.)
- The ITALMATIC universal solution itsensor®
- The other universal solutions for aftermarket (Schrader EZ Sensor, Huf IntelliSens, Alligator Sens.it, etc.).
- The multi-brand range of instruments for diagnosis, cloning and re-programming of sensors (Italmatic, Ateq, Bartec, Tecnomotor, etc), also with the OBD2 connection necessary for the sensors re-learning after installation.
- The complete range of Service Kits for ordinary maintenance of sensors which has to be carried out at every change of tyre, together with the comfortable assorted case with the service kits necessary for the most part of vehicles in circulation;
- The mechanical and dynamometric tools to mount and demount sensors.

Moreover, Italmatic propose a series of services like programs of Training, theoretical and practical, web/database services which can be integrated with applications of Customers (ex. configurator on-line), technical assistance.

italsensor[®] **3.0eVO** TPMS

Universal
Full coverage
OE Quality
Fit&Go
Smart Touch NFC
Programmable & Configurable

Without Programming

Italsensor 3.0evo è consegnato come default pronto per l'installazione (senza necessità di programmazione), esattamente come un sensore OE, per una selezione di veicoli Daimler Mercedes e BMW. (pag. 227)

Nel caso si necessiti di montarlo su un veicolo differente è sufficiente programmare il sensore normalmente.

3 Sec
Configurable

Configurabile in 3 secondi mediante l'utilizzo dei più diffusi tool di programmazione, con una copertura di circa il 99,5% del parco auto Europeo.

La configurazione è possibile perchè i protocolli sono già memorizzati nel sensore.

Programmable

Programmabile in modo tradizionale, in circa 20 secondi, qualora il protocollo TPMS per i nuovi veicoli non sia ancora stato memorizzato all'interno del sensore e reso disponibile per la configurazione; pertanto il sensore non diventa mai obsoleto.

NFC Enabled

L'esclusiva funzionalità SmartTouch (NFC) consente la programmazione di italsensor 3.0evo in millisecondi, semplicemente sfiorandolo con uno smartphone Android o Windows, oppure con la Italsensor SmartTouch PAD. Questa tecnologia assicura la totale assenza di interferenze.

Disponibile dal 3° quadrimestre 2019

Fit & Go

Fit&Go è la soluzione multi-protocollo di Italmatic, che rende compatibile il sensore su una molteplicità di veicoli che appartengono ad una famiglia di brand, nonostante usino diversi sensori OE. Esiste dunque una relazione 1:N completa tra sensore Fit&Go e i sensori OE che va a sostituire.

La gamma Fit & Go sarà rilasciata a fine 2019. È da subito disponibile il Fit & Go FG31 Mercedes e BMW pre caricato come default su Italsensor 3.0evo.

OE Replica è un sensore italsensor pre-programmato 1:1 rispetto ad un sensore OE. Il sensore è pronto dunque per essere installato sui veicoli che montano quel sensore originale. È semplice da usare come sensore OE con il vantaggio di costare meno.

Legenda
Legenda

Sensore sbloccato, riconfigurabile infinite volte
Unlocked sensor reconfigurable without limitations

Sensore bloccato, non può essere sovrascritto
Locked sensor, it can not be overwritten

As a default Italsensor 3.0evo is delivered ready to be installed (without any programming activity), exactly like an OE sensor, for a selected list of vehicles Daimler Mercedes and BMW.

In case needed to be installed on different vehicle, it is simply enough to program the sensor in a normal way.

Configurable in 3 seconds through most popular programming tools, with a coverage approx 99,5% of the European vehicles. Configuration is possible because the protocols are already stored in the sensor memory.

Programmable in traditional way, in approx 20 seconds, when the TPMS protocol for the new vehicles has not been yet stored inside the sensor and made available for configuration; in this way the sensor never becomes obsolete.

The exclusive SmartTouch feature (NFC) allows to program italsensor 3.0evo in milliseconds, simply positionig the sensor nearby an Android or Windows smartphone, or ththrough the Italsensor SmartTouch PAD. This technology ensures total absence of interferences. Available from 3rd quarter 2019.

Fit&Go is the multi-application solution of Italmatic, which makes the sensor with a group of vehicles belonging to a family of brands using different OE sensors. A 1:N relationship is established between the complete Fit&Go sensor and the OE sensors which it can replace.

The Fit & Go range will be relased in the end 2019. It is already available the Mercedes/BMW Fit & Go FG31 pre-loaded as a default on Italsensor 3.0evo.

OE Replica is italsensor pre-programmed for a specific OE sensor (1:1 relationship). The sensor is ready to be installed on the vehicles which mount the original one. It is simple to use as an OE sensor with advantage of cost competitiveness.

SENSORE UNIVERSALE ITALSENSOR 3.0EVO

UNIVERSAL SENSOR ITALSENSOR 3.0EVO

CAPTEUR UNIVERSAL ITALSENSOR 3.0EVO

Funzionalità SmartTouch NFC

L'esclusiva funzionalità SmartTouch, sviluppata ed introdotta da Italmatic per prima nel mercato del TPMS, consente di programmare il sensore in millisecondi, semplicemente sfiorandolo con uno smartphone Android o Windows o con la Italsensor SmartTouch PAD.

La funzione SmartTouch utilizza la stessa tecnologia (NFC "Near Field Communication") oggi comunemente adottata dalle carte di credito.

Oltre a garantire massima sicurezza durante il trasferimento dei dati, la sua applicazione nell'ambito TPMS ha il vantaggio di rendere impercettibili i tempi di programmazione (trattandosi di millisecondi) e di eliminare totalmente il rischio di interferenze (infatti questa tecnologia assicura che il sensore programmato sia esclusivamente quello che sfiora il device).

La tradizionale tecnologia di comunicazione radio frequenze LF/RF utilizzata per i sensori comuni oltre a essere più lenta ha un campo di azione più esteso (talvolta anche oltre al metro di distanza) rendendo possibili errori durante la programmazione (possibilità che venga programmato un sensore diverso da quello posizionato davanti al tool).

Ne consegue che il sensore italsensor 3.0evo SmartTouch si presta in modo perfetto per rispondere alle esigenze non solo del piccolo negozio gommista che non necessita più di investire in tool di programmazione tpms potendo usare direttamente il suo smartphone, ma anche alle più articolate necessità di contesti industriali che assemblano migliaia di ruote al giorno e che necessitano di ottimizzare e tracciare il processo di programmazione del sensore, integrandolo con degli automatismi al sistema gestionale (programmazione automatica del sensore senza intervento umano).

Italmatic pertanto ha realizzato delle soluzioni industriali end-to-end abilitate dalla tecnologia NFC SmartTouch che con un limitato investimento iniziale consentono alle realtà complesse di ottenere degli importanti benefici nel processo.

N.B.: Disponibile dal 3° quadrimestre 2019.

SmartTouch NFC feature

The exclusive SmartTouch feature, developed and introduced by Italmatic for the first time in the TPMS market, allows to program italsensor 3.0evo in milliseconds, simply positionig the sensor nearby an Android or Windows smartphone, or with the innovative Italsensor SmartTouch PAD.

The SmartTouch feature, uses the same NFC (Near Field Communication) technology today commonly adopted by credit cards.

In addition to the maximum security granted during data transfer, NFC application in TPMS field has the benefit to make extremely short the programming phase (just milliseconds) and to avoid totally the risk of interference (the technology ensure that the sensor actually programmed is only the one nearby the device).

The traditional radio frequency communication RF/LF adopted by the standard sensors, besides being slow, it has also a wider range of ation (even more than 1 meter), with possible errors during programming (it might happen to program by mistake not the sensor near the tool).

As a consequence, the italsensor 3.0evo Smarttouch is the best choice to match the needs from both small tyreshops (not needing anymore to invest in programming tool, having the possibility to use their smartphone) and wide scale industrial players assembling thousands of wheel sets per day, who need to optimize and ensure full traceability of the programming of the sensor, and to integrate the process into their IT systems (automatic programming without human selection of MMY).

Italmatic has developed the most integrated end-to-end solutions leveraging on NFC SmartTouch technology, that with a limited set-up investment, allow to the wide scale players to achieve the highest benefits and add value to their process.

Note: available from 3rd quarter 2019

SENSORE UNIVERSALE ITALSENSOR 3.0EVO

UNIVERSAL SENSOR ITALSENSOR 3.0EVO

CAPTEUR UNIVERSAL ITALSENSOR 3.0EVO

- Semplicità & economicità
- *Semplicity & cost advantage*

Italsensor 3.0evo è anche disponibile nella versione "OE-Replica" ovvero pre-programmato per un singolo protocollo, bloccato e non riprogrammabile, comportandosi in tal modo esattamente come un OE offrono i vantaggi della semplicità d'uso del sensore OE ma ad un prezzo più competitivo.

Italsensor 3.0evo is also available in the variant "OE-Replica" pre-programmed for a single protocol, locked and not re-programmable, acting exactly as an OE sensor, bring the simplicity in the usage of OE sensors at a more competitive price.

VDO

ATEQ VT56
ATEQ VT56

Vehicle coverage	VT56
Triggers OE sensors for all cars sold in Europe, USA	✓
Displays all sensor data (pressure, battery, temp, ID, frequency)	✓
Indicates OE sensor and service kit part numbers	✓
Relearn functionality	
Provides TPMS ECU relearn procedures (incl. indirect/direct/manual etc)	✓
Includes OBDII routines to reset the ECU in <2 min	✓
Toyota ECU unlock	✓
Sync-ID technology (OBDII routines for Ford, Mitsubishi, Suzuki etc)	✓
Pictures indicate OBDII location in car	✓
Retrieves and decodes TPMS DTC information	✓
Sensor programming functionality	
Universal sensor coverage	+ 10 brands of sensors coverage
Programs sensors by wheel set (up to 5 wheels)	✓
Retrieves ID from ECU	✓
Manual ID entry function	✓
Programs sensors from historical data	✓
Other functions	
Tests Remote Key Entry (RKE)	✓
Hardware & Software	
Display	4.3" LCD screen
Power	Lithium-ion battery
OBDII-module	✓
Dual RF antenna (315/433 MHz)	✓
Protective rubber sleeve	✓
Drop tested (X,X m.), IP54 etc etc	✓
Soft touch keyboard	✓
SD card stores 65k vehicle jobs in the tool and on PC	✓
Wi-Fi capable to synchronise jobs to PC	✓
VIN barcode scanner to select Make-Model-Year (US only)	✓
Compatible accessories	
TTD- tire tread depth	✓
Dockingstation + IR thermal printer	✓

SERVICE KIT E UTENSILI DI MONTAGGIO

SERVICE KIT AND TPMS MONTING TOOLS

SERVICE KITS ET OUTILS POUR MONTAGE TPMS

Raccomandazioni per la manutenzione ordinaria dei sensori TPMS OE

Recommendations for the ordinary maintenance of OE TPMS sensors

Ad ogni sostituzione degli pneumatici, i TPMS Service Kit devono essere utilizzati per sostituire quelle componenti che sono soggette ad usura quali la valvola in gomma completa con la vite o nel caso di valvola in metallo il dado, la guarnizione, il meccanismo interno ed il coperchietto. Quando si cambiano gli pneumatici su una vettura senza TPMS è normale sostituire le valvole; pertanto, anche in presenza di sensori TPMS, bisogna effettuare la corretta manutenzione. Questa azione, previene rotture e evita danni più importanti e molto costosi che potrebbero comportare anche la sostituzione dell'intero sensore.

Infatti, se perfettamente mantenuti, i sensori non devono essere sostituiti ad ogni cambio pneumatici. La loro vita media è estremamente alta e le batterie durano anche fino a 10 anni, in funzione anche dell'utilizzo del veicolo. Quindi, ad ogni cambio devono essere tassativamente sostituite le parti soggette ad usura.

At every replacement of tyres, TPMS Service Kits must be used to replace the components subject to wear like the complete rubber valve with screw or in case of metal valve the nut, the seal, the core and the cap. When tyres are changed on a car without TPMS, it is normal replacing valves; therefore, also in the presence of TPMS sensors, a correct maintenance has to be executed. This action prevents breakages and avoid more important and more expensive damages which could require also the replacement of the whole sensor.

In fact, if perfectly maintained, sensors do not have to be replaced at every change of tyres. Their average life is extremely high and batteries last up to 10 years, also according to the use of the vehicle. Therefore, at every change, the parts subject to wear must be imperatively replaced.

TPMS CAMION E BUS

TRUCK & BUS TPMS

TPMS CAMION ET BUS

VT TRUCK di ATEQ offre funzionalità appositamente studiate per la manutenzione di furgoni e autobus europei. Con il suo design robusto e compatto, il dispositivo legge facilmente i dati dei sensori, anche all'interno di ruote gemellate, ed è in grado di gestire fino a 22 ruote. Il dispositivo è compatibile con la maggior parte dei sensori TPMS di furgoni e autobus e può essere regolarmente aggiornato con nuovi veicoli pesanti non appena vengono introdotti.

The ATEQ VT TRUCK offers functionalities specifically designed for maintenance of European trucks and buses. With its sturdy and compact design, the tool can easily read sensors, even in twin wheels, and has the ability to manage up to 22 wheels. The tool is compatible with most truck and bus TPMS sensors and can be frequently updated with new heavy transport vehicles as soon as they are introduced.

ATEQ VT Truck

IT-7922-T	VT TRUCK Ateq - tool di diagnosi e attivazione sensori camion e bus VT TRUCK Ateq tool for diagnosis and activation truck and bus sensors	3 anni 3 years	gestisce fino a 22 ruote up to 22 tyres

Supporto per display in cabina con alimentatore
 Display portatile rimovibile retroilluminato, con batteria ricaricabile
 Modalità illuminazione display notturna
 Ripetitore compatto impermeabile con cavo incluso
 Self-test automatico all'accensione e aggiornamento ultimi dati letti
 Impostazione range pressione e temperatura
 Possibilità di convertire scale di misurazione pressione e temperatura
 Sul display i dati dei singoli pneumatici scorrono ogni 4 sec in modo da avere informazioni in tempo reale su pressione e temperatura
 I 6 sensori del kit vengono forniti già preimpostati, non è necessario alcun accoppiamento

Dashboard/windshield placement with charger
Portable and removable display with rechargeable battery
Night mode with back light
Compact-size waterproof repeater with cable included
Self-testing once powered on and latest data will be updated automatically
Adjustable monitoring pressure range and temperature value
Convertible pressure and temperature unit
On display data on tyre roll every 4 secs to have real time information about pressure and temperature
No need for pairing for the 6 sensors supplied in the kit

FUNZIONI:

- Controllo in tempo reale della temperatura
- Avviso pressione alta o bassa
- Avviso perdita di pressione veloce/lenta
- Avviso temperatura alta
- Avviso batteria del display carica bassa
- Avviso malfunzionamento sensori

CARATTERISTICHE GENERALI:

- Avviso visivo e audio
- Range di pressione rilavabile:
0~4.5Bar / 0~65PSI
- Alimentazione display con batteria AAA
- Sensori già abbinati dalla fabbrica
- Unità misurazione Pressione in PSI / Bar
- Unità misurazione temperature °C / °F
- Avviso allarme temperature alta regolabile
- Il Sistema si accende e spegne automaticamente grazie ad un sensore di movimento integrato

SOGLIE IMPOSTABILI:

- Valori soglia impostabili:
Pressione: 2.0 ~ 3.5Bar / 29~51PSI
- Temperatura alta:
+50 ~ +90°C / +122 ~ +194°F
- Soglia regolabile diversamente sulla ruota anteriore e su quella posteriore

FUNCTIONS:

- Control in real time of temperature
- High or low pressure warning
- Quick/low pressure drop warning
- High temperature warning
- Low charge warning of display battery
- Sensors malfunction warning

GENERAL FEATURES:

- Visual and sound warning
- Detectable pressure range:
0~4.5Bar / 0~65PSI
- Display feeding with battery AAA
- Sensors already combined by the factory
- Pressure measuring unit in PSI / Bar
- Temperature measuring unit °C / °F
- Adjustable high temperature alarm warning
- The system gets switched on and off automatically thanks to an integrated movement sensor

THRESHOLDS WHICH CAN BE SET:

- Threshold values which can be set:
Pressure: 2.0 ~ 3.5Bar / 29~51PSI
- High temperature:
+50 ~ +90°C / +122 ~ +194°F
- Thresholds adjustable differently on the front wheel and on the rear wheel
